

## 2006 Media Kit

October 2005

Dear Colleague:

Get your products in front of the audience they deserve---the world's leading scientists---and position your company alongside the most innovative minds in research by advertising with the Public Library of Science (PLOS). PLOS offers both print and online advertising (described in further detail on pages 4-7), as well as customized packages to meet your needs.

The PLOS family of journals has become THE destination for works of exceptional significance. Researchers---Nobel laureates, MacArthur "Genius Award" recipients and tomorrow's leaders---choose PLOS for its high impact, its rapid publication rate, and wide dissemination of peer-reviewed research. Every paper we publish is freely available to read, download, copy, distribute, and use---with no subscription fee, by anyone with an internet connection. This is the beauty of true open access which is central to the mission of PLOS. It is truly a leading force in making the world's scientific and medical research more accessible.
